

Master your service managements – for good!

C2 enables you to elevate your operations through efficient and flexible IT service management.

ITSM should be structured, secure and stable. Now it can be.

Discover an all-in-one IT service management cloud platform that'll help your teams drive great collaboration, effective delivery and powerful automation. All that without coding—or breaking the bank.

- Improve customer satisfaction with an intuitive service desk
- Take control over processes with automated workflows
- Customize and boost operations through asset management
- Reclaim your time and resources thanks to seamless integrations

Empower your service delivery

Enhance performance and automate workflows for simple or complex processes without a single line of code. Approvals, notifications, escalation, prioritization and beyond, we have you covered. C2 will elevate your productivity and let you focus on value-added tasks.

Boost your operations

Implement best practices fast to improve agility, drive change management and reduce downtime. Customizations galore! Transform the way you work & collaborate efficiently to bring structure to your services with robust CMDB and asset management features.

Synchronize all your tools

C2 is a leader in IT tool integration—simplify the way you deliver services & orchestrate all operations from one place. Easily sync your users' information and centralize all access. Connect all your systems to standardize horizontal or cross-platform processes with numerous powerful APIs.

Delight your customers

Prioritize and centralize requests through a customizable service catalog and a powerful selfservice portal, allowing you to deliver higher SLAs. Create one point of entry for your customers and tailor their experience to their needs.

It's the complete package

Intuitive service desk

Categorize instantly, manage prioritizations and track time to ease workload.

Powerful asset management

Track inventory, assets, licenses, POs and more inside a robust CMDB.

Automated workflows and processes

Escalate, manage workflows, assign tasks, or create and approve custom triggers.

Seamless integrations

Connect your favorite apps with APIs and webhook triggers

Trusted by private and public organizations
